* Tiebreaking procedure /here and below/
If two or more players have the same records in the datasheet #1, the average is calculated between the tied candidates based on the scale points (40 points for the highest record/score and 1 point for lowest record/score among all 40 participated players)

Example: Adam, Patrick and Cyril are tied for 4th, 5th and 6th place. Their points will be calculated based on left column scale as follows:
(37+36+35) : 3 = 36.0 points
